Boart Longyear Announces First Quarter 2019 Results

Boart Longyear Limited (**ASX: BLY**) - Boart Longyear, the world's leading supplier of drilling services, equipment and tooling for mining and drilling companies, announces results for the first quarter ended 31 March 2019. All results are referenced in US dollars.

Jeff Olsen, Boart Longyear's CEO, commented on the Company's results, stating, "Q1 was another terrific quarter on our path to recovery. We are very pleased with the results as they continue to demonstrate improvements in both the markets and our underlying business. This is clearly demonstrated by the \$7 million improvement in Adjusted EBITDA on \$2 million higher revenues. Notably, organic revenue on continuing operations grew 8% during the quarter driven by improved market conditions. The first quarter of the year is typically our slowest quarter and this year we had the best cash performance of any comparable quarter since 2007."

KEY METRICS FOR YEAR THROUGH 31 MARCH 2019 (Compared to 31 MARCH 2018)

- **REVENUE - \$190M - Up \$2M (1%). After eliminating impacts of FX, discontinued operations and slow-moving inventory, business grew by 8%**
- **ADJUSTED EBITDA - \$22M - Up \$7M (47%) on improved volume, pricing, and productivity gains**
- **NET PROFIT AFTER TAX - \$11M Improvement (65%). Invested \$10M of capital back into the business**
- **LEVERAGE - While market conditions may change we are on track to have leverage below 6x Adjusted EBITDA by year end**

RESULTS COMMENTARY

Revenues for the first quarter closed flat compared to the prior year and were impacted by FX currency movements, discontinued operations and higher sales from company initiative to reduce slow moving inventory in Q1 2018. Adjusting for the effect of those factors revenue increased 8% from the prior year period. Lower demand in the products business was driven by uncertainty in the global economy. Adjusted EBITDA increased from \$15M to \$22M, driven by improvement in pricing, cost reductions and productivity initiatives.

The Company experienced a notable improvement in cash from operations through March of \$3M (\$3M source through March 2019 compared to \$0M through March 2018). Net working capital increased from 31 December 2018 levels in line with the 2019 drill program start-ups.

Liquidity at 31 March 2019 was \$44M, comprised of cash balances totalling \$30M and a further \$14M of availability under the Company's asset-based loan facility.

STRATEGIC PRIORITIES

With improved financial and operating performance in 2018, the Company strategy is on target to continue that momentum through 2019. To create long-term value, Management has implemented directives to facilitate growth and to address imperatives to build customer loyalty, better understand customer needs, position the company to differentiate offerings ahead of the competition, and to improve upon its service excellence, especially with key accounts.

While long-term value creation is at the core of the Company's strategy, the Company continues to drive objectives to reduce debt, improve efficiencies, increase cash returned on investment, and improve overall profitability. With commodity markets trending upwards, steps are being taken to deploy capital while finding new growth segments and markets.

The Company's strategic focus is built upon providing customers with high-quality geological information through the use of its products, services, and increasingly important advanced technologies found within its expanding Geological Data Services (GDS). Coring equipment and products are consistently refined and developed to increase the quality of core extracted through exploration activities. GDS instrumentation and tools are a key part and competitive advantage to the Company's complete offerings, giving geologists and mining companies more timely geological information for critical decision making. These developments in exploration are driven by understanding the needs of customers and continually innovating to their greater expectations and requirements towards earning more efficiencies.

Footnotes:

- 1) Increase in Net Debt during the quarter was due to PIK interest being converted to debt as anticipated, and the impact of the IFRS16 accounting change which requires capitalization of previously off-balance sheet operating leases (\$30M).
- 2) Q1 EBITDA was benefited \$3M by the IFRS16 accounting change
- 3) Profit on Sale of Fixed Assets through the company's simplification project improved 2018 Q1 adjusted EBITDA by \$4M. This benefit was not repeated in Q1 2019.
